

What is it about?

The Agile Project Management (AgilePM®) course is aimed at those working in environments that incrementally deliver products to business throughout the project life cycle.

This course will confirm that a candidate has successful knowledge and understanding of the Agile Project Management guidance to work as an Agile Project Manager, managing projects with one than one solution delivery team.

This certification provides the ability to deliver Agile Projects in organizations requiring firm standards and visibility around Project Management, while enabling the fast pace, change and empowerment provided by Agile.

What's in it for me?

On completion of the course delegates will be able to:

- ✓ Empower the project team to make day-to-day decisions
- ✓ Change and evolve as the understanding of the requirements of a project deepens
- ✓ Use the Agile framework that encompass people, the technology that supports them and the processes that bind them together
