

## *What is it about?*

This course will benefit any individual working in a project management or cost control environment to enhance their knowledge of cost engineering, scope of estimating, planning and cost control.

The Certified Cost Technician course will demonstrate proficiency in the basic skills and knowledge of cost management. This course is your first step towards occupying a vital position in a project team and towards a successful career in cost engineering or (technical) project management.

The Certified Cost Technician course is specifically aimed at preparing delegates to pass the AACE CCT Certification exam

## *What's in it for me?*

On completion of the course delegates will be able to:

- ✓ Conduct a financial evaluation of projects
- ✓ Provide the complete scope of estimating, planning and cost control.
- ✓ Conduct controls and Earned Value Management on a project

# Certified Cost Technician (CCT)

## *Who Should attend?*

This specialized course is aimed at Project Engineers, Project Managers, Project Planners, Project Controllers, Project Schedulers, Project Accountants, PMO Managers, Cost Controllers, Cost Estimators, Cost Engineers, Quantity Surveyors.

## *Do I qualify?*

Delegates who wish to take the CCT certification exam must have:

- 4 years of industry related experience, or
- 4 years industry related degree
- Adherence to AACE's Canons of Ethics

## *What can I expect?*

- Cost
- Cost Estimating
- Project Planning
- Scheduling
- Progress and Cost Control
- Project Management
- Economic Analysis
- Statistics, Probability and Risk Management
- Exam Preparation

## *How and when can I attend?*

This cost course is an intensive 5 day course. Delegates will work through typical exam questions.

The Certified Cost Technician (CCT) exam is:

- 3 hours maximum
- 100 simple multiple choice questions
- Open Book – using AACE's CCT Primer and S&K only (must be in a binder), plus any style, battery operated calculator permitted (not provided by the testing centre)

The Certified Cost Technician (CCT) certificate is valid for 3 years and is non renewable. The CCT course facilitates you to move forward to get certified as a Certified Cost Professional (CCP).

Delegates receive:

- A course manual
- AACE International Certified Cost Technician Primer
- Skills & Knowledge of Cost Engineering, 6<sup>th</sup> Edition
- TCM Framework, 2<sup>nd</sup> Edition
- Certificate of Attendance

After 3 years, a Certified Cost Technician (CCT), with the relevant experience, should apply to become a Certified Cost Professional (CCP).

As cost engineers on both the Technician and the Professional levels are often required to perform the same functions and require the same skills. The Certified Cost Technician and Certified Cost Professional courses cover the same materials.

## *About PM Academy*

PM Academy South Africa was established in 2005 and expanded their service offerings to Botswana by establishing a local company in 2016. The strategic vision is to provide world class professional project management training, consulting and recruitment to the local and international markets. PM Academy has a wealth of experience and we have successfully completed projects, training and recruitment throughout Africa.

PM Academy is an AACE International Approved Education Provider (AEP).
